

PERRIN & ROWE[®]
MAYFAIR LONDON

Kitchen

The Perrin & Rowe story

Thirty five years ago in London, Bob Perrin & Greg Rowe had a vision to design and produce the highest quality kitchen and bathroom tapware. Their vision was to create original and authentic designs and to manufacture them using the best materials and the latest engineering technology. Bob & Greg wanted to take tapware beyond utility; to inject style, creativity and desirability into everyday objects. Their love of design and innovation led them to develop many of today's design classics and a range of patented tapware inventions.

The Perrin & Rowe brand became recognised as a world leader in premium quality tapware and accessories. Embracing innovation and new product development, the range now includes bathroomware and contemporary tapware. All Perrin & Rowe products are still designed and made in their own factories in England by a company that values the skills of its staff and focuses on the perfection of each product it designs, makes and delivers.

Perrin & Rowe is the real thing. Authentic designs, classical styling and engineering excellence ensure that each product will stand the test of time and provide years of enjoyment.

Timeless design

Design is a fundamental process that embodies the Perrin & Rowe range. By carefully combining an aesthetic appreciation of form, scale and detail with engineering prowess, their designers continue to produce the timeless designs that Perrin & Rowe is renowned for worldwide.

Classical styling

Classical style is unique and not based on a fleeting whim of fashion. Perrin & Rowe kitchen taps reflect a harmony of fine design and well-planned functionality. This is why they are specified by top designers and architects around the world, for contemporary and classical kitchens. They embody the essence of beautiful interiors and like any work of art, are appreciated by the discerning buyer.

Superior craftsmanship

The quality of Perrin & Rowe kitchen taps is immediately obvious: these are serious taps for people who know the difference. At Perrin & Rowe there is an immeasurable commitment to performance and durability with every tap built to last the lifetime of the kitchen. Each tap is machined from high quality brass before their skilled craftsmen hand polish, electroplate, fully assemble and rigorously test each product, for a superbly finished result.

The Finishes

Perrin & Rowe offers Australian designers and home owners a wide selection of premium quality finishes. The classical and country collections are available in chrome, nickel, pewter, gold, and English bronze finishes. The contemporary collection is available in the chrome and pewter finishes. All taps available in satin or polished uncoated bare brass by special order.

Chrome: A shiny finish with a hint of blue for a classical or contemporary feel.

English bronze: A satin, rich chocolate brown finish for a bold, distinctive look.

Nickel: A shiny finish with a golden glow. If left, nickel will develop an aged patina similar to silverware, with the occasional polish restoring its original gleam.

Satin brass: This is uncoated bare brass brushed for a satin look. Brass oxidises over time to gain a characteristic patina.

Pewter: A satin (brushed) nickel finish which is the perfect complement to stainless steel sinks and appliances.

Polished brass: This is uncoated bare brass with a smooth polished finish. Brass oxidises over time to gain a characteristic patina.

Gold: This finish, which contains real Gold, will give a luxurious look.

A solution for every space

Perrin & Rowe provide a seamless design solution for the modern kitchen.

Each collection includes standard, spray rinse and bar sink models to cater for multiple work stations whilst providing consistent styling throughout the kitchen.

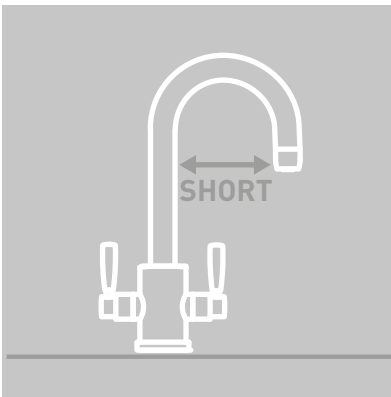

Monobloc taps

Perrin & Rowe kitchen taps are available in monobloc single lever or twin levers. Models include the single lever Aquitaine and Mimas, and twin lever Orbiq, Oberon, Picardie and Phoenician taps.

Bridge style taps

The bridge style mixer is perfect for wide sinks and as a feature on an island. The Io, Ionian and Provence taps are available with lever or crosshead handles.

Bar sink taps

The bar sink taps are specially designed with a shorter reach spout to suit the scale of a small prep sink, bar sink or kitchenette. Models include the single lever Aquitaine and Mimas bar taps and twin lever Phoenician bar tap.

Short reach spouts can be fitted to other tap models.

Filtered water tap

Perrin & Rowe provide stunning filtered water taps for your kitchen. Connect to the water filter system of your choice, or buy our Everpure filter system.

Hot water taps by Perrin & Rowe are coming in 2016.

Soap dispensers

Add a functional finishing touch with a soap dispenser for the ultimate workstation. Models include bench or wall-mounted and freestanding dispensers.

AU.4273 - Io with levers and spray rinse in pewter finish

Io with levers

Filtered Water Taps

2D + 3D
CAD FILES
AVAILABLE
FOR THESE
PRODUCTS

Perrin & Rowe filtered water taps are available in all finishes to complement the style of your chosen kitchen tap and contain a ceramic disc valve for many years of trouble free operation. The filter system is sold separately.

The filter system

In addition to the Perrin & Rowe filter tap, we can supply a complete filter system from Everpure, a highly esteemed American filter company.

The Everpure canister filter is positioned under the bench and connected with braided stainless steel hoses. The standard filter is the Everpure H-54 which removes impurities, chemical contaminants, parasitic cysts and other microscopic particles that may be in your water supply. While these filters remove undesirable contaminants and odours, health enhancing minerals like magnesium and fluoride remain.

For homes wishing to filter all cold water running through the main kitchen or a bathroom tap, including those collecting their own drinking water, we suggest using the Everpure Platinum filter. It is designed for this use with four times the flow rate and twice the capacity of the standard filter cartridge. This filter also inhibits limescale build up in water using appliances.

Everpure recommends each cartridge is replaced every twelve months.

Spray Rinse

Perrin & Rowe's spray rinse kitchen taps are popular and highly functional fittings that make light work of washing the dishes, rinsing vegetables, or filling pots and vases. The durable 1.2m hose offers virtually unrestricted use, even on a large sink.

Perrin & Rowe's patented spray rinse is operated using a sophisticated diverter mechanism which forms part of the body of each spray rinse tap. Turn on the tap to the desired mix of hot and cold water, then press the button on the spray rinse to divert the flow to the rinse. Water will cease to flow from the spout of the tap when the spray button is released.

Each precision engineered spray rinse handle is designed to complement the style of its accompanying tap. By keeping the spray handle distinct from the tap itself, Perrin & Rowe's iconic kitchen tap designs remain intact and are enhanced by this stylish and useful addition.

Please note that the spray rinse is an integral part of each spray rinse tap and cannot be added later to a standard Perrin & Rowe kitchen tap.

Perrin & Rowe Country, Classical, Contemporary and Orbiq spray rinse handles

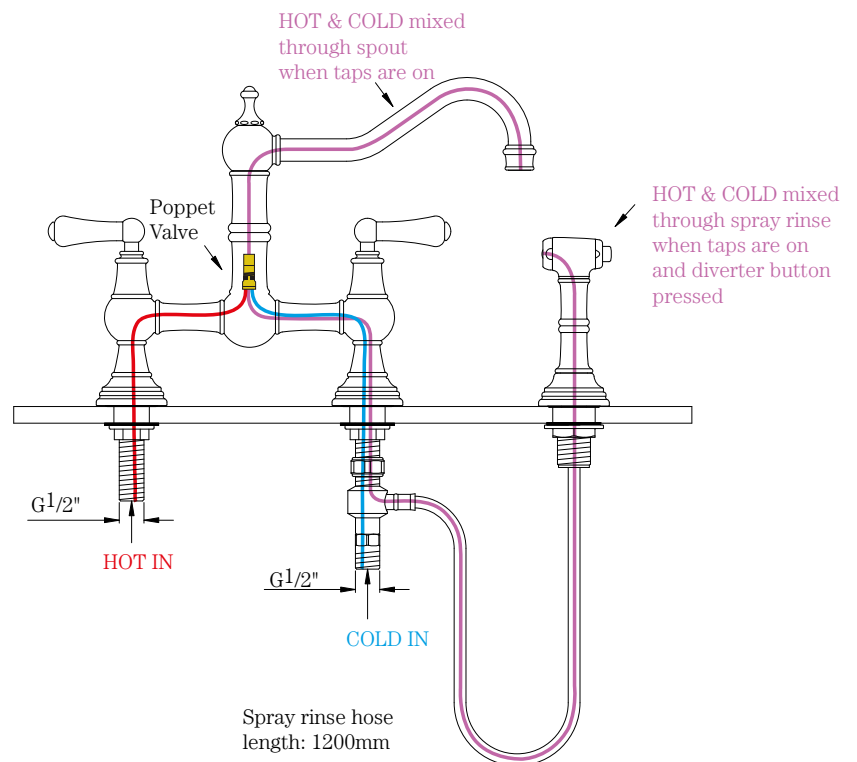

Diagram of the underbench fittings of a spray rinse tap.

Bespoke levers

For a small additional cost the classical Phoenician and Ionian lever-handled Perrin & Rowe taps can be tailored to the surrounding interior by changing the colour of the lever inserts. Lever handles which are white porcelain can be changed to black, cream or metal to complement the tap finish.

Metal levers on country style Aquitaine, Picardie and Provence taps can be changed to white porcelain, black or cream Corian.

Black accents engage the eye and form an inspired design element, especially when paired with black granite, while white handles provide harmony in a soft toned room. Integrate these levers with the choice of Perrin & Rowe finishes to create very special fittings for a kitchen or laundry.

Bespoke spouts

For some Perrin & Rowe kitchen taps, spouts of differing lengths are available to suit the particular needs of an installation.

The standard reach for a Perrin & Rowe kitchen tap is 235mm. For smaller prep and bar sinks, Perrin & Rowe has designed a range of taps with a more discrete spout reach of 150mm. If you require a longer spout for the Aquitaine, Picardie and Provence models, Perrin & Rowe produce a spout with a 280mm reach.

Cabinet Hardware

Perrin & Rowe offer classically designed door hardware to complete your project. The Perrin & Rowe contoured cabinet knobs are produced in two sizes, Ø25mm and Ø31mm. Ball knobs are Ø32mm and reeded knobs are Ø32mm. Pull handles are 94mm wide.

Cabinet knobs and pulls left to right: AU.7110, AU.7100, AU.7200, AU.7210, AU.7300.

Hooks, Rings & Rails

To complete your kitchen, Perrin & Rowe accessories are carefully designed, exquisitely detailed and produced from solid brass to the highest quality standards.

The extensive range includes hooks, rings and rails which can also be useful in the laundry. Towel rails can be shortened in length.

Single, double and treble hooks left to right, AU.6921, AU.6421, AU.6922, AU.6422, AU.6923

Towel rails top to bottom: AU.6461, AU.6942

Towel rings left to right: AU.6435, AU.6935

Soap Dispensers

Perrin & Rowe soap and lotion dispensers are made from top quality brass and feature a stainless steel pump mechanism. They will not rust or discolour the contents. They are available in free-standing, bench-mounted or wall-mounted models. All models feature a lift-out pump to enable easy filling from the top.

Bench mounted soap and detergent dispensers left to right: AU.6495, AU.6995, AU.6695

All accessories are available in all finishes to complement the Perrin & Rowe ranges of tapware.

Freestanding soap and detergent dispensers left to right: AU.6433, AU.6933, AU.6633

Why purchase Perrin & Rowe made for Australia?

The English Tapware Company is the dedicated source of Perrin & Rowe tapware in Australia. The English Tapware Company worked closely with Perrin & Rowe product designers and manufacturing teams in England to obtain Australian WaterMark certifications for the products they need to specially manufacture for Australia.

Whilst the visual appearance of Perrin & Rowe taps sold in other countries does not differ from those made for Australia, they are in fact very different. Taps produced for other countries are not made to Australian plumbing Standards nor WaterMark certified and a registered plumber is not able to legally install them into an Australian home. Local authorities check for WaterMark certification when a project is signed-off and insurance companies may decline a claim when non-WaterMark certified product has been installed.

Purchasing Perrin & Rowe products from The English Tapware Company ensures you receive goods that are compatible with Australian plumbing fittings and regulations and are WaterMark certified and WELS registered so they can be legally installed in Australia.

The English Tapware Company provides a warranty on all Perrin & Rowe tapware, accessories and bathroomware which it imports and sells in Australia. There is no warranty for privately imported product.

WELS: Water Efficiency Labelling & Standards

The Australian Government's Water Efficiency Labelling & Standards (WELS) scheme came into force in 2006. This scheme is designed to reduce water consumption and applies to kitchen taps, basin taps, showers and toilets, as well as other water using appliances.

All Perrin & Rowe kitchen, basin and shower outlet fittings and toilets from The English Tapware Company have WELS registration.

Australian Standards certification

Perrin & Rowe tapware, toilets and bidets sold in Australia by The English Tapware Company carry the WaterMark certification symbol certifying that they are specifically made for Australia in compliance with a range of Australian Standards. Perrin & Rowe products sold in other countries are not made to Australian Standards and a registered plumber is not able to install them into an Australian home.

Construction

Unlike some modern tapware that is made from chrome coloured plastics or aluminium alloys, Perrin & Rowe taps are still made from solid brass. Brass has proven to be the ultimate material for tapware, withstanding years of constant use and temperature variation without cracking or distortion.

Stock in Australia

The Perrin & Rowe product imported by The English Tapware Company is specially made for Australia. We endeavour to maintain a consistent level of stock of regularly sold items in the chrome, nickel and pewter finishes. We have a small stock of the other finishes and can arrange for large orders of these finishes to be made for us in England. If a product is not in stock or custom orders are requested, the manufacturing time is generally 6-8 weeks.

15 Year Warranty

The English Tapware Company Limited provides a fifteen (15) year warranty for the Perrin & Rowe tapware purchased from The English Tapware Company Limited or indirectly from The English Tapware Company Limited via an authorised Perrin & Rowe dealer in Australia. Full details of the warranty and its conditions are available on our website.

Ceramic disc cartridges incorporated within Perrin & Rowe tapware are a consumable item and have a parts replacement warranty for five (5) years from the date of purchase. This consumable components warranty provides for the supply of replacement cartridges during this period. Flexible handshower and kitchen tap spray rinse hoses, 'O' rings and washers, non-return valves, poppet valves and aerator inserts are also consumable components and covered by a five (5) year parts replacement warranty from the date of purchase. All warranties exclude damage caused by misuse, improper installation or vandalism. See website for full terms & conditions.

Ceramic disc valves

Superseding conventional tap washers, Perrin & Rowe taps are fitted with German ceramic disc valves, operating with a quarter turn from off to on. All valves and cartridges will provide many years of effortless operation, are easily and inexpensively replaced and have a five year warranty.

Installation

Minimum inlet water pressure:

Kitchen taps with a spray rinse require 1 bar / 100 kPa to operate the diverter mechanism. There is no minimum inlet water pressure for standard taps.

Maximum inlet water pressure:

5 bar / 500 kPa *(This is the maximum allowed by Australian plumbing regulations)*

Maximum inlet water temperature:

85° Celsius

The English origin and superb engineering of Perrin & Rowe kitchen taps mean that they can be used in homes with either equal or unequal inlet water pressure and where there is low pressure from a supply tank, solar heating or continuous flow hot water heater. Please advise The English Tapware Company if you are purchasing tapware for installation into homes with low or uneven inlet pressures and they can be supplied to suit this situation.

Handle Alignment

At Perrin & Rowe every detail counts. Every ceramic disc valve in a Perrin & Rowe product has an acetal handle alignment vernier positioned between the spindle of the valve and the spline of the handle. This vernier allows fine-tuning of the handle position during assembly and installation, for perfect handle orientation so that HOT & COLD lettering is aligned.

Specification and Installation

For individual product specification sheets including dimensioned drawings and product information please visit the specific product page at www.englishtapware.com.au.

Perrin & Rowe installation guides are included in all product boxes.

CAD files

A comprehensive 2D and 3D CAD library is available for the products in this brochure.
